

Petyo Lazarov

Web Developer

I bring a wealth of experience in web development with WordPress, proficiently working with a range of essential technologies. My expertise spans HTML, CSS, and JavaScript, including the dynamic capabilities of TypeScript. I am skilled in crafting immersive user experiences using frameworks such as React and Next.js. Furthermore, my proficiency extends to backend technologies like Prisma and database management, encompassing PostgreSQL and MySQL. With a strong foundation in both frontend and backend development, I am well-equipped to deliver comprehensive and polished digital solutions.

INTERESTS

Reading

Bicycle riding

Traveling

Board Games

PERSONAL PROJECTS

Internal Company Dashboard

- Custom internal dashboard created with Next.js, TypeScript and Material UI. The application is designed to provide multiple graphical components, a specific user interface tailored to the needs of the company, different user roles, login, logout, authentication, etc.

Single Page Applications (SPA)

- JavaScript-based tools for internal use such as a live preview of a list of landing pages with visual options. The dashboard contains useful tools that support the workflow of employees in the company. The tool provides multiple filters and sorting methods for searching, various viewing options, data export, and more.

Foundation "Smiling Bulgaria" [↗](#)

- WordPress website, designed and developed based on the software engineer training at SoftUni.

Magazine Website

- Freelance WordPress project for a magazine website featuring a bespoke theme. The project involved developing visually captivating platform tailored specifically for magazine content. With a focus on user experience, the custom theme was designed to offer seamless navigation, responsive layout, and engaging visuals, providing readers with an immersive magazine browsing experience.

Awards Website

- As a freelancer, I have developed a WordPress award website, incorporating custom Gutenberg blocks to enhance its functionality and design.

Website Company Portfolio

- WordPress website for a company specializing in animated vide production. Creating a diverse range of custom Gutenberg blocks, dynamic blocks, and integration with various APIs. Integrating appointment booking apps.

Website Company Portfolio

- A WordPress corporate website for a company involved in the installation of security and fire alarm systems.

WordPress Plugin Development

- Developing a WordPress plugin for a service marketplace involving search and service offerings. Involves writing various PHP classes to process a large volume of data and deliver the most pertinent result to users based on their specified criteria.
